Concrete ballast: Either precast or cast-in-place, concrete ballast is a practical foundation solution on re-purposed brownfield sites, landfills with membrane caps, environmentally remediated/closure sites ...

The choice between end plates and flat plates for pipe pile foundations might seem minor, but it's actually one of those "make-or-break" decisions that impacts everything from installation costs to ...

In solar farm construction, the selection of the appropriate pile type is crucial for ensuring the stability and longevity of the infrastructure. Steel is one of the most commonly used materials for ...

Unique patented Magnum dual-cutting edge helix and extended pilot tip offer increased placement accuracy and makes it easier to achieve plumbness. Moment balanced dual cutting edge also ...

Supports for ground-based solar panel arrays (Figure 1) come in a wide variety of forms, including cast-inplace concrete piers, precast concrete piers, helical (screw) piles, ...

The pit bottom support is a reinforced concrete structure that is monolithically cast with two lower 0.9 m diameter borehole cast-in-place piles to form the final load-bearing unit.

Central to this solar revolution are Photovoltaic (PV) solar cells, experiencing a meteoric rise in both demand and importance. For professionals in the field, a deep understanding of the manufacturing ...

CFA / ACIP piles (continuous flight auger piles, auger cast piles, or augered cast-in-place piles) are cast-in-place piles using a hollow stem auger with continuous flights.
