How much money does Stockholm exergi receive from the Energy Agency?

Stockholm Exergi receives 20 billion kronor from the Energy Agency, to collect and store carbon dioxide.

Time was running out, says CEO Anders Egelrud. » Published: Mon 27 Jan 2025 11:07 CET

How long will Stockholm exergi be paid out?

The funds will be paid out over a maximum of 15 years. Stockholm Exergi has three years to start storing carbon dioxide (with the possibility of a two-year extension), after which the payments will begin. If they are not up and running within three years, they have not lived up to the requirements in the procurement.

Will Stockholm exergi be able to control EOR?

Stockholm Exergi told us²³ they were opposed to their CO₂ being used for EOR, that they were pushing for EOR to be banned in Swedish regulations, and that they would make EOR a red line in their contract with their storage supplier. These intentions are a welcome signal, but to what extent will the company be able to actually control this?

Why is Stockholm exergi promoting BECCS?

Like many others, Stockholm Exergi is promoting BECCS as cheaper than other "negative emissions" technologies, which aim to remove carbon dioxide (CO₂) from the atmosphere. This is misleading as BECCS removes carbon from plants, not the atmosphere, unlike other forms of Carbon Dioxide Removal (CDR) like Direct Air Capture (DAC) Technologies.

How does Stockholm's energy supply cope with a power shortage? with increasing power shortages. To meet the region's needs, the energy company Stockholm Exergi and the power operator Polar ...

Stockholm Exergi is a Swedish energy company that runs a woody biomass-powered combined heat and power plant in Stockholm. They are planning to using a Bioenergy with Carbon Capture and ...

Understanding the Stockholm Energy Storage Project Construction Regulations is critical for engineering firms, contractors, and green energy investors aiming to align with EU standards and local ...

The energy policy will therefore create the right conditions for efficient and sustainable energy use and a cost-effective Swedish energy supply system with low negative impacts on health, environment and ...

notice outlines subsidy policies for new energy storage, including the following: Independent energy storage capacity will receive a capacity compensation of 0.2 CNY/kWh discharged, gradually ...

This article explores Sweden's green transition in the Stockholm region, covering renewable energy, sustainable urban planning, transportation innovations, government policies, ...

Stockholm Exergi will start capture and store biogenic carbon dioxide within three years. The support amount of just over 20 billion SEK will be paid out continuously over a maximum of 15 ...

Energy storage systems have the potential to play a key role in integrating renewable energy into the power grid. However, the usage of energy storage, for example by using a battery, is not explicitly ...
