In support of the clean energy transition, the New York Power Grid Study was undertaken in order to identify distribution upgrades, local transmission upgrades, and bulk transmission investments that ...

National Grid's upgrades support current and future electricity demands on the grid, reducing our reliance on fossil fuels and connecting clean energy produced right here in Upstate New York.

National Grid delivers reliable and resilient energy to more than 20 million people in New York and Massachusetts, all while transforming our energy networks for the future.

The Upstate Upgrade will support New York's increasing demand for electricity and encourage further investment and growth with a more efficient and resilient grid.

Pay your bill, report outages and gas emergencies, and find useful energy saving and safety tips.

A state-wide scenario-based study to analyze transmission, generation, and storage options for achieving 70% renewable generation by 2030 and a zero emissions grid by 2040, sponsored by ...

New York (NY) region electricity overview (demand, forecast demand, net generation, and total interchange)  
1/23/2026 - 1/30/2026, Eastern Time

Below is a representative visualization of how this transformation could potentially take place across the State using information from an Initial Scenario in the Zero Emissions Electric Grid in NY by 2040 ...
