In the context of the Covid-19 crisis, the government has increased its funding for an existing policy to support grants to households and companies for installing solar PV. The new funding is provided on ...

The Ministry of Finance on March 18, 2025, published a proposal (Swedish) that would reduce tax subsidies for installing solar cells.

Using data from all applications to the capital subsidy program for PV in Sweden between 2009 and 2021, we analyse the impact of the subsidy level on investments over time.

In Sweden, solar PV installations have grown exponentially. As of 2023, the country had a total installed solar PV capacity of 4.1 GW. This surge is largely attributed to government initiatives such as ...

The report covers policy measures and incentives used by Sweden to promote renewable energy. The report details promotional measures in Sweden both for the overall renewable energy ...

Sweden lacks a roadmap or strategy on solar PV, but there are some reports by the Swedish Energy Agency including aspects on potential, barriers, roadmaps, etc.

The Government considers that it is difficult to reach Sweden's commitments under the ESR and LULUCF through measures in Sweden alone and considers that the commitments should be ...
