-----  
How can Tajikistan improve its energy system resilience?

Tajikistan seeks to enhance its energy system resilience by reconnecting to the United Energy System of Central Asia. This effort is supported by large infrastructure projects of common interests, such as CASA-1000 and the Rogun Hydropower Plant Project.

Can Tajikistan's solar power be harnessed to meet energy-policy goals?

In addition to hydropower, Tajikistan's significant solar power potential could be harnessed to meet several energy-policy goals simultaneously, and the government has recently set a target for renewable energy to provide 10% of generating capacity by 2030.

Why is Tajikistan upgrading its transmission infrastructure?

Tajikistan is upgrading its transmission infrastructure to support domestic energy needs and regional exports. The 500 kV Datka-Sughd transmission line, developed under the CASA-1000 project, enables energy exports to Pakistan and Afghanistan. Several small- and medium-scale projects were commissioned in early 2025, including:

Is Tajikistan expanding its solar energy capacity?

Tajikistan is rapidly expanding its solar energy capacity, with several large-scale projects underway:

With abundant hydropower resources and increasing solar/wind investments, Tajikistan aims to stabilize its grid using battery energy storage systems (BESS). The government's 2023 National Energy ...

Containerized energy storage solutions now account for approximately 45% of all new commercial and industrial storage deployments worldwide. North America leads with 42% market share, driven by ...

The blank outline map above represents Tajikistan, a sovereign nation in Central Asia. The map can be downloaded, printed, and used for coloring or map-pointing activities.

Tajikistan is a small land-locked country that borders Kyrgyzstan, Uzbekistan, China, and Afghanistan and is home to some of the highest mountains in the world.

Modern Tajikistan combines all the powerful aspects of its raw and untouched nature where the highest mountain peaks of Central Asia reach for the skies and some of the world's largest glaciers slowly ...

This article explores how battery storage projects, hybrid power plants, and grid modernization strategies can stabilize Tajikistan's electricity supply while supporting renewable expansion.

Tajikistan seeks to enhance its energy system resilience by reconnecting to the United Energy System of Central Asia. This effort is supported by large infrastructure projects of common interests, such as ...

At request of the Tajik Ministry of Energy and Water Resources, USAID supported the installation of the solar plant in Murghob to complement the nearby 1.5 megawatt "Tajikistan" (formerly Aksu) ...
