Our Community Solar program provides residential and commercial customers an opportunity to subscribe to a portion of a local solar farm. Each month subscribers receive energy ...

Learn all about community solar - a way to benefit from solar energy without installing panels on your roof.

Community solar projects, sometimes called "solar farms," are a collection of solar panels that generate electricity for a community. Where available, both renters and homeowners can access community ...

Community solar projects represent a groundbreaking approach to shared renewable energy, allowing residents and businesses to benefit from solar power without installing panels on their own properties.

Community solar - also called shared solar or solar gardens - means local solar panels that many people in the community share. Unlike rooftop solar that serves just one home, these solar ...

Community solar can allow all households and businesses to access the benefits of solar energy, such as lower electricity costs, regardless of whether they're able to host a system on their own roof.

Community solar gardens, also known as shared solar, solar farms, or solar gardens, are large-scale solar photovoltaic (PV) installations that enable multiple participants to benefit from a ...

Community solar connects large-scale solar arrays to the grid, allowing all New Yorkers to choose renewable energy even if they are unable to install solar where they live.
