The Blitta solar power plant is a major pillar of Togo's energy strategy. With a capacity of 50 MWp, it covers 92 hectares and is equipped with over 123,000 photovoltaic panels.

The 42MW solar PV plant in Sokodé represents a significant milestone in Togo's renewable energy journey. With the continued support of international partners and the firm ...

Whether you're planning a residential solar installation or a large-scale industrial project, these manufacturers offer tailored solutions for Togo's unique climate and energy needs.

Construction of a utility-scale solar-plus-storage project is now underway in northern Togo. The 25 MW Dapong solar project will include 36,000 solar panels across 52 hectares, along ...

Renewable energy project developer AMEA Power confirmed that they recently signed a power purchase agreement (PPA) and concession agreement with La Compagnie Energie Electrique ...

Now one of the largest solar PV IPP plants in West Africa, the power plant is located 267kms from Togo's capital, Lomé, and has a planned production of nearly 90,255MWh of power a ...

Since 2020, Togo has increased its electrification rate from 52% to 69%, providing thousands of rural households electricity through solar kits and the Blitta solar power plant.

The solar technological availability, technology markets, and public policy status were documented--including the solar resource and the solar PV potential in Togo.
