-----

TW Solar Technology's PV Testing Center at the Jintang Base has received the Laboratory Accreditation Certificate from the China National Accreditation Service for Conformity ...

Calling the certificate the world's first, Tongwei says that its TNC technology based single-glass and double-glass modules have successfully passed the new standard series of tests.

A solar panel's rated wattage means nothing if it's not delivering in real-world conditions. Field tests show new panels underperform by 5-15% right out of the box, with cheaper polycrystalline ...

Tongwei Solar (Nantong) Co., Ltd. recently achieved T&#220;V S&#220;D IEC 62941 certification, signaling adherence to international standards in photovoltaic module reliability and safety.

A PV module is a pre-assembled group of solar cells and can be considered the smallest unit of a photovoltaic system, while a PV panel includes a group of several PV modules interconnected in ...

First, Tongwei's solar photovoltaic (PV) modules are certified under IEC 61215 and IEC 61730, the gold standards for solar panel performance and safety. These certifications aren't handed out lightly.

By developing and deploying clean energy solutions, Tongwei Solar is helping to create a more sustainable future. The ECS certification not only validates the company's current efforts, but ...

The certificate demonstrates that a product sample was tested and evaluated at a specific time, and found to be in conformity with the assessment requirements specified in the certificate. A CoC is ...
