Trina Solar TSM-DE21 650-670W belongs to the Vertex module series based on the Advanced Mono PERC technology. These modules consist of p-type, half-cut multi-busbar wafers for efficient current ...

POSITIVE POWER TOLERANCE High customer value Lower I-COE (Levelized Cost Of Energy), reduced BOS (Balance of System) cost. shorter payback time Lowest guaranteed firstyear and ...

Trina Vertex series with ultra-high power is advantageous in the manufacturing supply chain, the compatibility of inverters, brackets, etc. in the system, and the value of customers such as LCOE and ...

Introducing the Trina Solar Vertex 670W panels, the epitome of innovation and efficiency in solar energy technology. These cutting-edge photovoltaic modules leverage advanced multi-busbar (MBB) and ...

TrinaSolar's Vertex TSM-DEG21C.20 MBB 635-670W bifacial solar panels deliver exceptional power output with a peak capacity of up to 670W and a module efficiency of 21.4%.

Specifications included in this datasheet are subject to change without notice. Version number: TSM_EN_2021_A

Trina's top-tier TOPCon cells offer impressive efficiencies up to 23.2%. Low-voltage design enables higher string power, delivering increased energy yield. N Type has excellent product reliability, with ...

Imagine boosting your project's return with the Trina 650W 670W solar panel, designed to slash your LCOE and BOS costs while delivering up to 21.6% efficiency in a single, high-density module.
