The Renogy 100 Watt Solar Suitcase will make charging on the go as easy as 1-2-3! If you're looking for a convenient and portable power solution, the Renogy 100W Monocrystalline ...

This case study drives home the point that every acre of tobacco converted to solar panels potentially puts a dent in that number. Every time a tobacco farmer converts the crop, it eases ...

Michigan Tech researchers contend that tobacco farmers could increase profits by converting their land to solar farms, which in turn provides renewable energy generation.

If every tobacco farm in North Carolina converted to solar energy production, it could save half a million lives a year. Pearce and his colleague Ram Krishnan, who designs large solar ...

This study analyzes key factors influencing conventional tobacco farming economics in the U.S. over a sensitivity of realistic future values. Then tobacco crop profit is compared to a sensitivity ...

Replacing tobacco farms with solar panels to generate electricity would be a vast payoff for farmers and for human beings, according to researchers at Michigan Tech.

Those batteries can now be made out of used cigarette butts, according to a team of South Korean scientists who published their research in the journal Nanotechnology on Tuesday.

Large-scale projects, such as the Noor Complex in Morocco and the Ivanpah Solar Power Facility in California, demonstrate the potential of concentrated solar power (CSP) technology ...
