Are solar panels a hazardous waste under RCRA?

If these metals are present in high enough quantities in the solar panels, solar panel waste could be a hazardous waste under RCRA. Some solar panels are considered hazardous waste, and some are not, even within the same model and manufacturer.

Can hazardous waste solar panels be recycled?

Hazardous waste solar panels that are recycled may be able to use regulatory exclusions available under RCRA, including the transfer-based exclusion (Title 40 of the Code of Federal Regulations section 261.4 (a) (24)) in states that have adopted the 2015 or 2018 Definition of Solid Waste Rule.

How did net metering affect the solar industry in 2022?

The fallout from the utilities commission's 2022 net metering decision included an 82% drop in customers requesting connections for rooftop solar installations, and industry groups expected a loss of about 17,000 jobs during the first year of the change. We're CalMatters, your nonprofit and nonpartisan news guide.

On one hand, removing the panels doesn't eliminate your claim. On the other hand, proving performance issues is more difficult when the panels aren't currently installed and generating ...
