As Europe's BESS industry matures, project owner-operators are taking on more control--and risk--when it comes to procuring technology and services for their projects.

The Western European markets of Ireland, the Netherlands, Belgium, Germany and France exhibit moderate daily price spreads ranging from 83 to 121 EUR/MWh, alongside varying ...

As Europe accelerates its energy transition, battery energy storage systems (BESS) are playing a growing role in grid flexibility and renewable integration.

Southeast Asia now offers the least-cost solution for U.S. and European buyers seeking to circumvent direct China exposure. The report also evaluates the strategic role of non-lithium storage ...

Though the battery energy storage revolution continued to unfold across Europe in 2024, setting yet another annual installation record, we also witnessed a substantial slowdown in market ...

SolarPower Europe warns that, despite projecting to reach 400 GWh by 2029, the region needs at least 780 GWh to meet its energy flexibility goals. Battery storage is no longer an optional ...

Search all the announced and upcoming battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in European Union (EU) Region with our ...

It offers near real-time data on the deployment of storage facilities across Europe, including an interactive dashboard and map, and identifies all the technologies, from battery storage ...
