What is a photovoltaic system?

Photovoltaics (PV): Devices that convert solar energy into electricity using semiconductors (this conversion is called the photovoltaic effect). Solar panels are photovoltaics and make up a PV system. Power output/rating: The number of watts a solar panel produces in ideal conditions.

What is a building integrated photovoltaic (BIPV)?

Building-integrated photovoltaic (BIPV): Solar panels that can be integrated with a building's roof tiles rather than mounted on top of the roof. Also known as a solar shingle. Ground-mounted solar: Solar panel systems mounted in a foundation on a large plot of open land.

What is a solar panel rating?

Solar panels are photovoltaics and make up a PV system. Power output/rating: The number of watts a solar panel produces in ideal conditions. It's a good indicator of quality, but most solar panels don't experience ideal conditions for more than a few moments.
