What happens if a solar panel is broken?

Common causes of solar panel damage are falling objects, thermal stress, and micro-cracks and scratches. A broken solar panel may continue to work, albeit at a reduced efficiency. Broken solar panels pose a serious fire and safety risk and must be removed and replaced. Some companies can fix broken solar panels, but this is costly.

Can a broken solar panel be replaced?

The general rule of thumb is that broken or scratched glass can be replaced if it hasn't caused any further damage to the solar panel. Any damage to the inner components requires the solar panel to be replaced. Can I Fix Solar Panel Parts Myself?

Can a broken solar panel be recycled?

A broken solar panel that cannot be repaired will have to be taken away for recycling. Whatever you do, do not throw it in a landfill or dump it anywhere. Solar panels contain harmful or toxic elements that can cause environmental damage if they leach into the ground.

How do I know if my solar panel is damaged?

Damage can manifest in various forms. Some can be easily recognised through visual inspections, while others can be more subtle and may require you to call an expert to inspect the broken solar panel. Common types of damage include: Broken or Cracked Glass - Cracked or shattered glass is one of the most obvious signs of damage.
