FASTscrew can produce the right parts to simplify your process. FST100 wurde als universales PV-Montagesystem für Dachmontage auf Schräg- und Flachdächern entwickelt. der FST Technologie ...

The fabrication process of photovoltaic brackets follows a precision-engineered workflow on the production line, encompassing decoiling, flattening, precision punching, roll forming, and cut-to ...

The bracket production list includes the total number of sets of brackets, the model and quantity of each bracket, the model and quantity of bolts, and auxiliary materials such as spring ...

Our manufacturing base covers 9,000 square meters in Shanghai, China, with annual production capacity of 5GW. Another manufacturing base covers 30,000 square meters in Anhui, China, with ...

The Photovoltaic (PV) Bracket Production Line is a fully automated solution designed for the mass production of solar mounting structures (solar struts/channels).

Solar photovoltaic bracket is a special bracket designed for placing, installing and fixing solar panels in solar photovoltaic power generation systems. The general materials are aluminum ...

The detailed list of solar design bracket production will be sent to the production department along with the production drawings of the screen cabinets in this contract.

The company is located in Shanghai Fengxian Industrial Zone, covers an area of 4,000 square meters, has its own research team and production base, employs 60 people, and has two production lines.
