In semiconductor manufacturing, a wafer is cut into multiple chips, whereas a PV wafer more or less retains its size even as part of the module. Thus, there is a need to evaluate the whole ...

Chinese solar manufacturer Longi has released the first detailed technical explanation of how it built the world's most efficient silicon solar cell.

A group of scientists from Chinese solar module maker Longi has described in a new scientific paper the 27.81%-efficient hybrid interdigitated back-contact (HIBC) solar cell it unveiled in...

LONGi only produces monocrystalline PERC solar panels as they have been focused on producing single crystal (mono) silicon wafers since the early 2000s. Generally their panels have ...

To buy the best solar panels, be sure to compare prices, warranties, and efficiencies of different solar panel manufacturers. Here are the top 20 brands for 2026.

A name from the list of Top-10 world's solar brands, LONGi Solar has been called the fastest-growing PV manufacturer at times. What kind of panels does it offer and what are its ...

With a massive production capacity, LONGi is not only driving down costs of more efficient wafers and solar cells but producing a range of cost-effective solar panels for residential and ...

Chinese PV module maker Longi has revealed that its proprietary hybrid interdigitated back contact (HIBC) crystalline silicon solar cell based on a full-size silicon wafer has achieved...
