How many merger & acquisition deals are there in wind energy?

The number of merger and acquisition (M& A) deals increased considerably in the wind energy sector globally. On May 9, 2022, BP plc, an oil and gas company, planned the acquisition of a 30% stake in the Asian Renewable Energy Hub (AREH) project, from CWP Renewables, Intercontinental Energy, Vestas, and Macquarie Group for \$36 billion.

What makes wind energy more competitive than other renewable sources?

Factors such as advancements in technology and reduction in costs continue to make wind energy more competitive than energy from other renewable sources. According to GlobalData's deals database, wind energy has always led M& A deals in terms of value compared to energy from other renewable sources.

Who owns Stor-skälsjön wind power?

On April 15, 2022, an asset management company, MUNICH ERGO Asset Management (MEAG), entered into an agreement with renewable energy solution providers Eolus Vind and Hydro REIN to acquire a 75% stake in the Stor-Skälsjön wind power project for \$28.5 million, which has a generation capacity of 260 MW.

Is wind energy a good option for M& A deals?

According to GlobalData's deals database, wind energy has always led M& A deals in terms of value compared to energy from other renewable sources. The total value of M& A transactions globally increased from \$106 billion in 2020 to \$210 billion in 2021, which registered nearly 100% growth over that in the previous year.
