Product Description WPS-S Series High-Power Wide Range Programmable DC Power Supply, which covers different power levels 1.5kW, 3kW, 5kW, 6kW, 10KW, 12KW, and 18KW. This ...

With the BOLAB AnyWave control unit, you can control your power supplies and execute any waveform you desire. Whether you want simple sine waves, complex signal shapes, or specific test profiles, ...

These modules are used in distributed power architectures to efficiently step-down (buck) or step-up (boost) voltages close to the load for improved efficiency.

It's like having many power supplies in one! The N8900 Series provides stable output power, built-in voltage and current measurements, and autoranging output voltage and current from 80 V to 1500 V ...

In many ATE systems one or more low-power, fixed-voltage supplies are needed to provide electrical power for any periphery within the ATE cabinet. For this purpose, the XG 1500 DC output power ...

This series high power programmable DC power supply adopts high frequency isolation and active PFC design, which makes it can achieve high efficiency at any output point.

All models are CE and UKCA marked in accordance with the Low Voltage, EMC and RoHS Directives, have worldwide Safety Agency approvals (UL/cUL/IEC/EN 61010-1) and offer a five year warranty.

Up to 1500VDC and 1000VAC - enclosures that safely distribute electrical power from the main supply to various parts of the system. Using your desired PLC or computer platform and HMI screen or manual ...
