Located off the coast of Fengxian district on the northern shore of Hangzhou Bay, the project forms part of Shanghai's broader strategy to integrate offshore wind and solar energy. It will ...

Situated on the southeastern edge of the Taklamakan Desert, the solar panels, standing over two meters tall, serve a dual purpose. Besides generating power, they act as windbreaks, ...

It has the edge of having a diversified portfolio: solar, wind power, hydroelectric energy, biogas, geothermal power, etc., thereby reducing the dependence on limited resources such as coal, ...

The contractor is actively exploring ways of ecological restoration, trying to build a multi-in-one cyclic development model involving new energy power generation and desert control. The project was ...

This project will serve to supply green electricity to the tenant companies at the Thang Long Industrial Parks II, and the JGC Group is executing the engineering, procurement, and construction (EPC) ...

The project adopts an intelligent coupled power generation mode of "concentrated solar power + photovoltaic," which solves the problems of volatility and intermittency of pure photovoltaic power ...

This station will directly reduce fossil fuel dependency and contribute to a greener energy mix. The Xukuang Phase II project represents CDS Solar's expertise across a diverse range of renewable ...

We have built a sound marketing and project support network and set up as many as 21 branches, providing strong support to the full life cycle of the projects. We have excellent project management ...
